

## TABELLA LORDO NETTO 2007

La Finanziaria per il 2007, Legge 27 dicembre 2006, n. 296, ha introdotto molteplici novità in materia di imposta sulle persone fisiche, andando a modificare le norme contenute nel Tuir. Le maggiori novità possono essere ricondotte ai seguenti aspetti:

- ridefinizione degli scaglioni e delle aliquote di imposta;
- introduzione delle detrazioni per carichi di famiglia;
- introduzione di detrazioni per particolari tipologie di redditi;
- eliminazione delle deduzioni di imposta (base, per tipologia di reddito, per oneri familiari).

Va precisato che nel redigere la tabella non è stato considerato (perchè è diverso da calciatore a calciatore), il carico familiare e, per quanto riguarda le aliquote di compartecipazione all'Irpef, per le Regioni ed i Comuni, sono state inserite nel percorso di calcolo, la quota parte della percentuale che accomuna tutte le Regioni e Comuni d'Italia.

Sempre la legge Finanziaria 2007 dispone, con effetto dal 1° gennaio 2007, l'aumento di 0,30 punti percentuali dell'aliquota contributiva dovuta dal lavoratore per il finanziamento dell'assicurazione generale obbligatoria e delle forme sostitutive ed esclusive della medesima.

Con la circolare numero 3, del 8 febbraio 2007, l'Ente Nazionale di Previdenza e di Assistenza per i Lavoratori dello Spettacolo, ha ufficializzato, al fine di determinare i valori contributivi per gli sportivi professionisti, i massimali e le aliquote contributivi per l'anno 2007, alla luce anche delle novità di legge.

Si precisa che per l'anno 2007, il limite minimo di retribuzione annuo per l'assolvimento degli obblighi contributivi di legge (importo minimo sul quale si calcolano i contributi da versare anche nel caso in cui la retribuzione effettiva sia più bassa), è pari ad euro 12.926,16.

Negli specchietti riepilogativi riportati di seguito si evidenzia il costo sociale e fiscale per l'anno 2007, costo a carico del calciatore.

## CONTRATTI DI DURATA INFERIORI ALL'ANNO

Al fine di evitare spiacevoli sorprese è importante un uso corretto della tabella lordo-netto, in particolare nel caso di sottoscrizione di contratti che hanno una durata inferiore ai dodici mesi.

Il calciatore professionista che viene tesserato a stagione sportiva già iniziata o che rinegozia il proprio contratto durante la stessa annata calcistica, per garantirsi mensilmente la cifra netta pattuita deve utilizzare la tabella con dei correttivi.

E' infatti rilevante considerare che la tabella lordo-netto postula dalla considerazione che l'importo inserito ed i relativi contributi sociali e le ritenute fiscali sono calcolate sulla base di un reddito percepito in dodici mensilità.

Di seguito è riportato uno specchietto che insegna le modalità per rapportare all'intera annualità i contratti di durata inferiore all'anno, contenente un esempio che, in questi casi, è molto più esaustivo ed intuitivo di qualunque esposizione normativa.
